Responsibilities

NSA's systems environment is a haven for Computer Scientists, with vast networks able to manipulate and analyze huge volumes of data at mind-boggling speeds.

Computer Scientists at NSA have access to acres of hardware, software years ahead of current commercial technology, microprocessor-based advances, beyond-the-horizon supercomputers, leading-edge activities in programming, signals (including analog control), GUI's and AI, neural nets, information security, the design and implementation of encryption, and advanced algorithms.

You will employ these advanced technologies to accomplish ongoing Agency initiatives and programs, develop new technologies, test approaches, research solutions, and solve problems of national consequence.

At NSA, you have the opportunity to maximize your knowledge, skills, initiative, your ability to learn, and be imaginative in two major areas: development and support. Within these areas, many specialties are available, including:

- Database Management
- Real-time Interface
- Information Resource Management
- Graphics
- Project Management
- Executive Support
- Telecommunications
- Object-oriented Programming
- Web Design
- Information Systems Security
- Vulnerability Discovery

Qualifications

Ideal candidates should possess the following:

- A Bachelor's degree in Computer Science or related field
- A minimum GPA of 3.0
- Strong written and oral communication skills
- Innovative thinking to solve complex problems
- The ability to work well with others in a collaborative environment

Pay, Benefits, & Work Schedule
Salary is commensurate with education and experience.

Salary range: $42,209 to $97,333.

How To Apply - External
