- Snow/Ice Storm
National Response Plan

• **NIMS-(National Incident Management System)**-The National Incident Management System (NIMS) is a systematic, proactive approach to guide departments and agencies at all levels of government, nongovernmental organizations, and the private sector to work together seamlessly and manage incidents involving all threats and hazards—regardless of cause, size, location, or complexity—in order to reduce loss of life, property and harm to the environment.

• **ICS-(Incident Command System)**-a set of personnel, policies, procedures, facilities, and equipment, integrated into a common organizational structure designed to improve emergency response operations of all types and complexities. ICS is a subcomponent of the National Incident Management System (NIMS)

• **COOP-(Continuity of Operations Plan)**-to ensure that agencies are able to continue performance of essential functions under a broad range of circumstances.
