Research Cyberinfrastructure Analyst

The OSU High Performance Computing Center is seeking an individual to deploy and maintain a cloud computing platform using open source tools. The skills most needed include Linux and Windows system administration, networking, security, scripting, application deployment, workflow development, user interface development, and data management.

This position is central to deploying a cloud computing platform. Partial support for hardware and collaborating informatics personnel comes from the National Science Foundation, so participation in grant reporting, and interaction with large, inter-disciplinary research teams is a must.

This person will also represent OSU on the statewide informatics team.

**Professional Qualifications:**
Bachelor’s degree in Computer Science, Math, Engineering, or any field involving significant computational component is required. The ideal candidate must have at least three years of relevant experience. OSU prefers a Master’s degree with five years relevant experience.

**Anticipated start date:** As soon as possible.

Complete application at OSU Human Resources, 106 Whitehurst, or apply on-line at [https://jobs.okstate.edu/](https://jobs.okstate.edu/). When applying, refer to job posting 11156.

To receive full consideration, applications must be received no later than October 31, 2014.

*Oklahoma State University is an Affirmative Action/Equal Opportunity/E-verify employer committed to diversity and all qualified applicants will receive consideration for employment and will not be discriminated against based on race, color, religion, sex, sexual orientation, gender identity, national origin, disability or protected veteran status. OSU is a VEVRAA Federal Contractor and desires priority referrals of protected veterans for its openings. OSU-Stillwater is a tobacco-free campus.*
